The *Producer Edition* features dry trackouts of each sample. This enables you to process the individual kit pieces as you wish and offers maximum flexibility for your productions.

*All samples were recorded in **70 BPM**, giving you the most flexibility in combining as much as possible. The tempo of the samples can be adjusted/quantized within your DAW. Please check your DAWs manual on how to do so.*
For DAWs supporting 'iXML' (Cubase, Pro Tools, etc.), the tempo information has been inserted and can be used to quickly quantize the samples.
